Kloia in the Finance Industry

Kloia has worked with financial companies of various sizes - from **enterprise level banks** to **fintech startups.** We have the financial familiarity and the technical competency to **build tailor-made solutions with proven components.** We are particularly strong in payment system integrations and architecting platforms for complex financial flows.

Payment Systems

Payment system integration with payment providers including innovative features like 1-click and, async payment.

Compliance and Security

Building platforms that comply with strict financial regulations and security standards.

Enterprise Release Orchestration

Designing and implementing release orchestration for enterprise financial applications.

eposnow

Taking advantage of automated, more efficient software deployment, Epos Now teams can deliver enhancements to customers faster than before. "We currently have a three-week release cycle, which isn't fast enough for customers," Hart says. "By modernising the API, we have started our journey towards releasing more frequently which means we can push out new features to customers when they need them, as opposed to when we can deliver them.

İŞBANK

After a detailed PoC, IsBank chose the XebiaLabs Enterprise DevOps Platform to automate and orchestrate the release pipeline with XL Release in order to accelerate software delivery and to provide visibility for each step of the process, and XL Deploy in order to be able to deploy more frequently to any environment with confidence.

Since 2015, kloia provides services for the transition of the legacy workloads to frontline technologies in **Cloud, DevOps, Software Testing and Microservices and Generative AI.**

We specialize in transforming your digital capabilities and modernising your entire tech stack.

We have customers in 15 countries from a wide variety of sectors. We embrace a free working culture; kloians are geographically spread in 4 countries and three timezones.

Kloia in the Retail Industry

From product categorisation to scaling infrastructure, Kloia has been working with retail e-commerce companies for 8 years. We have developed high-performance modules for product categorisation, advanced search, and smart payments.

Peak Times Scaling

Scaling based on customer-specific business metrics.

Product Search & Categorisation

Multi-dimensional product categorisation and advanced search capabilities.

Eventual Consistency

Applying the CAP theorem to various business flows optimized for specific transaction requirements.

n11

Event-sourcing brings ultimate scalability to N11 who have peaks during Black Friday. This also increased resilience in the overall system, which helped N11 not to have any overall system cutoffs.

YILDIZ ★ TECH

All group companies share the same underlying framework used by microservices, including all cross-cutting concerns and group-wide business functions.
